

Battery Watering Gun

GUN-X – The Next Generation in Watering Gun Technology

The world's best selling watering gun is now faster, more durable

In 1983, Philadelphia Scientific introduced the first affordable and reliable battery watering gun. Developed as an inexpensive and safe alternative to manual battery watering, the watering gun delivers a precise flow rate. No battery room should be without this essential maintenance tool.

Our watering guns are popular for their reliable automatic shutoff and their ability to water batteries quickly while improving filling accuracy

and operator safety. Their non-electric automatic shut off allows for low-cost watering with a quick return on investment.

Now Philadelphia Scientific takes the battery watering gun to a new level of performance with the introduction of GUN-X. Compared to hand watering, our next generation battery watering gun reduces labor costs up to £100 a year for each 18-cell battery.

Battery Watering Gun

GUN-X incorporates the best of all previous models with significant improvements of its own!

The Battery Watering Gun (Model: GUN-X) is ergonomically designed, with a rugged, easy-squeeze handle and a 45° bend nozzle. The new design requires less bending over to fill the battery.

In addition, GUN-X incorporates a host of features that deliver the following benefits:

- Greatly improved strength and durability
- Faster fill speed
- Elimination of post shut-off drip
- Visual indication of shut off
- Improved ease of use
- Reliable performance
- Easy to operate
- Compact
- Lightweight

With a diameter of 0.67 in. (17 mm), our nozzle easily fits flip-top vent caps, as well as all standard quarter-turn, bayonet and DIN openings.

When paired with our Blinky or Smart Blinky battery watering monitors, the Watering Gun is part of an effective battery maintenance programme that will reduce costs and improve efficiencies, saving you time and money.

Philadelphia Scientific's Battery Watering Gun-X: The world's best selling watering gun is now better than ever.
