

# The DAHBASHI GROUP wishes all it's readers Eid Mubarak !

## Jamal joins the "Twenties Club" !

he joined the company. It was through sheer dedication, willingness to learn and hard work that Jamal is independently looking after the service aspect of the Traction Power business in Kuwait.

No mean achievement that !

Here's what some of his seniors and colleagues have to say about him.

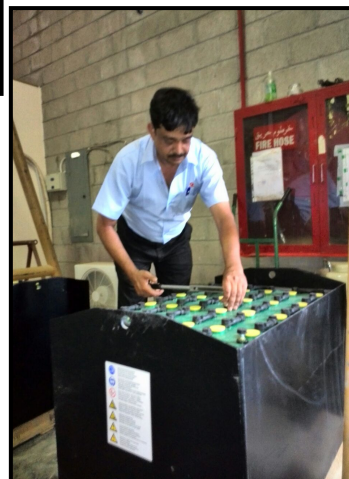

*"I met Jamal for the first time as a carpenter and painter when he was refurbishing my office cabin at the old Rashidiya workshop. The very first impression I had of him was, 'here is a man who has the commitment, right attitude and versatility to do any job, if provided the right guidance and training' and I could not stop myself but ask him if he was interested in joining us in the workshop. Once he was on board, he proved me right by undertaking various jobs of different nature such as assisting technicians in earthmoving mechanical repairs, refurbishing and painting battery crates, assembling and commissioning of batteries and carrying out minor repairs of Chargers."*

He came to us by chance !

Working as a carpenter in a joinery that was commissioned to refurbish Saif's cabin in our old workshop in Rashidiya, Jamal was a member of the motley crew put together for the job. It did not take long for him to catch Saif's eye and the rest, as they say, is history !

He joined us 20 years ago as a strapping young man; 20 years on, he is an experienced hand at a trade that was foreign to him when

*"A man of few words, he went about successfully completing the assigned tasks in a confident manner and maintaining excellent inter-personal skills. Over the years, he continuously developed his skills and was subsequently handling Battery / Charger repairs before I had to reluctantly let him get transferred to our associates in Kuwait, Dahbashi HEPS."*

*"Although it was a loss for our Dubai service operations, I was happy for him; it was an opportunity to climb up the ladder in the Dahbashi Group. The only tribute I can give for his 20 years of service with the Dahbashi Group – I wish I could have more 'Jamals' with me" !!!*

**Saifuddin**

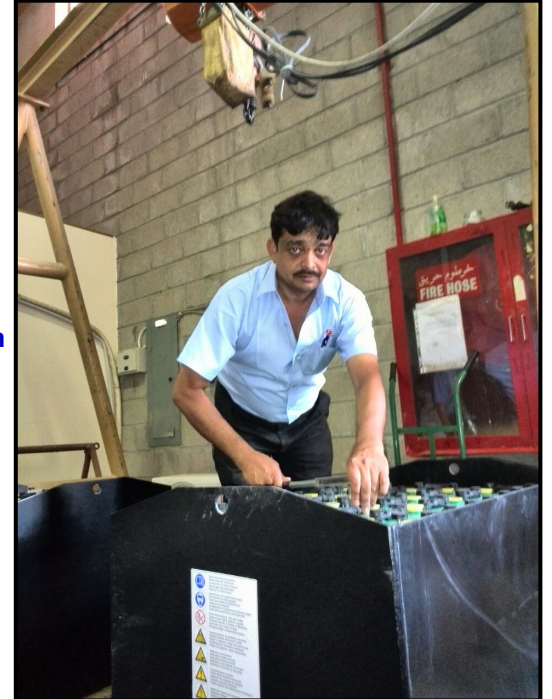

*"I truly had an amazing experience working with him; he was the most dedicated, knowledgeable and enthusiastic technician we have had in our department. He would readily accept any job handed over to him and with his remarkable knowledge, he could easily alternate parts wherever required to finish the jobs within the deadline. Not only as a technician but in general, he was a gem of a person. No customer has ever had any complaints about him. In fact till today, many of our prominent customers inquire about his well-being."*

*"Heartiest congratulations to him for achieving this milestone."*

**Yusuf**

*"My association with Jamal has been very limited. I have always found him to be very sincere, hard-working and genuinely caring for the company's interests. He has been largely responsible for the success of the Kuwait MHD" !!*

**Chandan**

*"During my tenure in Kuwait, it would have been almost impossible to achieve our goals of promoting our Traction Power products without Jamal. He is a very honest and hard-working guy, it was not in his nature to refuse a job, even on holidays. He was very punctual. He had great respect for the customers as well as his colleagues. He maintained good relations with everyone and the customers appreciated his services."*

**Ashok**

*"We are highly appreciative of the good manner in which he has handled the responsibilities entrusted to him. He is a man who has always taken an extra step towards his work and believes in completing any assigned job on or before time. We hope he continues to move ahead on the path of excellence with his selfless service for many more years with us."*

**Murtuza**

*"Mr. Jamal is a kind, polite, patient and a very helpful person. I have learnt a lot from him over the last three years. It is a pleasure working with him."*

**Ambrish**

*"I have known Mr. Jamal since 2012; I personally feel he is a very humble, soft-spoken and hard working gentleman."*

*"Have worked with him for gathering some forklift inquiries and found him to be very active and aggressive in achieving the given tasks."*

*"In spite of being assigned to the Traction Power section, I have seen him assisting the Parts Division team several times for deliveries, transferring parts in the stores etc."*

*"Overall he is a sincere and hard-working employee of the Group."*

**Sarfraz**

*"Jamal Bhai continues to be a great asset to the company. We always know that our customers are in good hands when they are with him due to his patient nature and his sensitivity to their needs. We appreciate the quality of work he puts out on a daily basis. His loyalty and willingness to accept assignments, often beyond his normal duties, are qualities he should indeed be proud of."*

*"Wishing him more success in the years to come, all we can say is, keep up the good work."*

**Qais**

Twenty years is more than half a person's working life. Heartiest congratulations to Jamal for achieving this milestone; he has truly been a very active member of the Group and has played no small part in its success and growth over the years ! All of us wish him the very best of luck, more success and a continued long stint with the Group !

Truly well done !

## DAH BASHI COMPLETES ITS FIRST RESERVE POWER PROJECT !

GroE batteries are one of the finest lead acid batteries within the **Hoppecke** range. Using pure lead technology, strong electrodes and a low acid density, the GroE cell is engineered to provide a design life up to 25 years under optimal environmental conditions. Giving attention to every aspect of battery construction, **Hoppecke** has ensured that GroE's quality is strictly maintained to provide a product beyond any customer's expectations.

Coupled with the optional use of AquaGen recombination system, the watering intervals can be extended by minimizing emissions.

With keen attention to detail in technology,

**DAH BASHI ENGINEERING**

construction and ultimately, performance, **Hoppecke** GroE batteries are tailor made to serve stand-by power applications in Power Plants, Sub-stations and Uninterruptible Power Supply Systems (UPS).

Having recently started our foray into Reserve Power, we were extremely lucky to win a contract for the supply of a whole bank of GroE cells to replace the existing ones at an installation in Dubai.

Once the cells were delivered however, we were asked by the customer to quote for the installation as well. We were fortunate enough to be awarded the installation contract as well.

The Service Department, after a series of meetings with the MRP Division and a couple

of site visits, formulated a plan for the removal of the existing cells, refurbishment and painting of the existing racks and finally, the installation and commissioning of the new GroE cells.

It was only during the course of the cells removal process that we realized that the existing racks would be incapable of supporting the new set owing to ageing and material fatigue. Emphasis on safety being paramount, the customer asked us to supply a brand new support system by air freight.

The new racks duly arrived; the cells were installed, charged, commissioned and tested under load.

Once the Service Department was satisfied with the load test results, the battery bank was officially handed over to the customer.

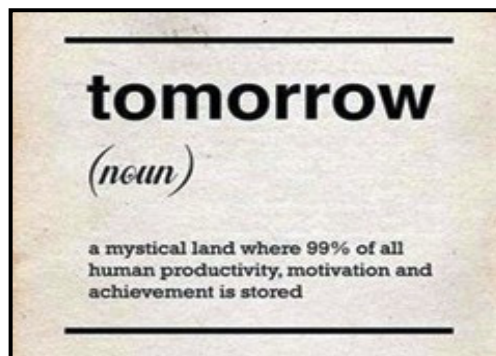

The whole project was efficiently handled from start-to-finish; kudos to the Service Department's team for its sterling performance. It is all the more creditable that it went off without a hitch since it was the first such installation for Reserve Power.

"We are satisfied with **DAH BASHI ENGINEERING's** work; apart from being a professional outfit, you are extremely co-operative and flexible," remarked the Assistant Superintendent.

No doubt a project that the whole company should be proud of !

## EXERCISE WITHOUT EFFORT !

Here is a program of strenuous activities that does not require much physical effort.

- 01) Beating around the bush
- 02) Jumping to conclusions
- 03) Climbing the walls
- 04) Swallowing your pride
- 05) Passing the buck
- 06) Throwing your weight around
- 07) Dragging your heels
- 08) Pushing your luck
- 09) Making mountains out of molehills
- 10) Hitting the nail on the head
- 11) Wading through paperwork
- 12) Bending over backwards
- 13) Jumping on the bandwagon
- 14) Balancing the books
- 15) Running around in circles
- 16) Tooting your own horn
- 17) Climbing the ladder of success
- 18) Pulling out all the stops
- 19) Adding fuel to the fire
- 20) Opening a can of worms
- 21) Putting your foot in your mouth
- 22) Starting the ball rolling
- 23) Going over the edge

24) Picking up the pieces

**Whew ! That is some workout !  
Now sit down and...**

25) Exercise caution.....!!!
