2019

2019

2020

BLUMAQ TODAY.

Blumaq has been the first and only national company that offers the customer a complete and global alternative of the original product with its own brand (filters, pumps, transmission, brakes, ...) and under the premises of quality-price. Currently, the brand is recognized in more than 91 countries.

BLUMAQ TECHNICAL CENTER

BLUMAQ QUALITY SYSTEMS

Blumaq Technical center, our quality control center

Blumaq Technical Center (BTC) is a solid organization composed of an expert team of research, design and development engineers (specialized in the different systems of the machine), a global quality management team, spare parts quality control engineers (inspection) and supplier quality engineers working in the field around the world.

Why are we so concerned with the quality in Blumaq?

As seen from any angle, Blumaq has established a new technical standard in the spare parts industry, developing a state-of-the-art technical center that operates as an OEM in terms of quality assurance standards. Its zero-defects strategy is articulated in 3 main principles;

- **Research, Design and Development**
- **Product inspection**
- **Supplier quality management**

Quality comes from inside.
